- **TECHNICAL SKILLS** : HTML/CSS, React/Next,js, PHP, Python, MySQL, Nodejs
- **TOOLS** : Docker, Wordpress, Azure
- **OTHER SKILLS** : Restful API, Agile methodology, Docker, Linux
- **LANGUAGE** : Indonesian, fluent English

WORK EXPERIENCE

We're All About Marketing (WAAM)

Wordpress Developer   **Sept 2023 - Feb 2024**

- Collaborated with clients and project managers to gather website requirements and improve structure, layout, and user experience
- Gained hands-on experience building and updating websites using HTML, CSS, and WordPress in a real production environment
- Created and maintained project documentation, and drafted client communications for technical updates and approvals

Double Chin (ex: Din Tai Fung)

Warehouse Assitant (data entry)   **Jan 2016 - June 2025**

- Picked and packed supervisor orders accurately and efficiently to meet daily service requirements
- Performed quality checks on packed items to ensure correct products, proper labeling, and compliance with hygiene standards.
- Conducted daily inventory checks and entered stock levels into internal systems for accurate tracking and replenishment.

Citisuper

Customer service and data entry   **Sept 2022 - Current**

- Provided friendly and efficient service by assisting customers with inquiries, purchases, and product recommendations
- Recorded product deliveries, updated stock levels, and maintained inventory accuracy and spreadsheet systems.
- Entered sales, pricing, and promotion data into store databases, ensuring information was current and error-free.

PERSONAL PROJECTS

ADMIN / STAFF PAGE FOR CARSHOWROOM

- Developed a full-featured CRUD web application for managing car listings using PHP, MySQL, HTML/CSS, and JavaScript
- Implemented admin/staff login functionality with secure authentication and role-based access control
- Designed user-friendly interfaces to add, update, delete, and view vehicle records, with real-time validation and database integration

PERSONAL PROJECT (Weather and Digital Menu)

- Designed and built a responsive single-page website using Next.js, Tailwindcss, MySQL and Python
- Showcased personal projects, technical skills, and experience with clean UI and smooth navigation
- Practiced frontend development skills including component structure, state management, responsive design principles, and learn about API call and REST Api
